

To Whom It May Concern:

Jon Fichtelman worked for Deep Sky Technologies, Inc., (Deep Sky Tech.) during the summer of 2003. He was brought in as an intern to work with our programming staff during the busy summer months. The working environment at Deep Sky Tech. requires that all employees, even summer interns, display a high degree of personal and professional accountability for their work; as well, all employees are expected to maintain a very high level of quality in all of their efforts.

Mr. Fichtelman excelled in all of his tasks during his internship at Deep Sky Tech. He continually showed a level a knowledge and technical expertise that was beyond his years. Additionally, he was always willing to learn new skills and excelled in a challenging and varied environment. He was always reliable to finish his tasks both in a timely manner and with a high degree of quality. It was especially enjoyable to see how Mr. Fichtelman matured, and how his skills and experience became more refined, throughout the summer that he worked with our programming staff.

Having worked with Mr. Fichtelman personally throughout his internship period, I can honestly recommend him for any endeavors he might choose to follow in the years to come. I am confident that he will be able to handle any task which is set out before him. His intelligence and willingness to learn make him an invaluable asset to any organization he may so wish to join.

Please feel free to contact me at any time for further information on this subject. I would be more than happy to provide any details necessary to further Mr. Fichtelman's efforts.

Respectfully,

Steven G. Willis
President, Deep Sky Technologies, Inc.
